Laboratory Practice

Index to Volume 21

Entries in bold type indicate original articles.
Entries in italics indicate book reviews.

Subject Index

A

Absolute configuration of metal complexes, edited by C. J. Hawkins, 37.
Absorptiometer, (Evans Electroselenium Ltd.), 207.
Absorptiometers, Signal converter for, (Infometrics Ltd.), 295.
Adaptor allowing liquid separations in volumetric flasks, by T. W. Collie, 31.
Addition of a dual-column system of amino acid analysis to the Technicon AutoAnalyzer, The, by L. B. James, 639.
Adsorption of Organic Compounds on Electrodes, by B. B. Damaskin *et al*, 117.
Advances in electrochemistry and electrochemical engineering Vol. 8, edited by P. Delahay and C. W. Tobias, 355.
Advances in Optical and Electron Microscopy Vol. 4, edited by R. Barer and V. E. Cosslett, 737.
Advances in Structure Research by Diffraction Methods, Vol. 4, edited by W. Hoppe and R. Mason, 737.
Aerosol reaction vessels, (Fischer & Porter Ltd.), 457.
Air pollution monitor, (Glass Developments Ltd.), 293.
Amino acid analysis, (Bio-Cal Instruments Ltd.), 53.
Amino acid analyzer, (Bio-Cal Instruments Ltd.), 295.
Amino acid analyzer, (Jeolco Ltd.), 205.
Ampoule for use in liquid nitrogen, Plastic, (Sterilin Ltd.), 455.
Analytical spectrometry, by L. de Galan, 354.
Analyzer, Automated enzyme, (Pye Unicam Ltd.), 835.
Analyzer, Automatic enzyme (Auriema Ltd.), 135.
Analyzer, Computer controlled, (Technicon Ltd.), 833.
Analyzer, Computer controlled amino acid, (Techmation Ltd.), 831.
Analyzer, Hydrocarbon, (Hartmann & Braun), 515.
Analyzer, Sulphur, (Bendix Vacuum Ltd.), 593.
Analyzers, X-ray fluorescence, (Telsec Instruments Ltd.), 679.
Animal cages, Flexible, (Jencons Scientific Ltd.), 513.
Anodic behaviour of copper in elapsed time indicators, The, by B. Malathy Pushpanavam, K. S. Indira, K. Sundararajan, B. A. Shenoi and H. V. K. Udupa, 624.
Apparatus for the determination of the semi-permeable characteristics of charged membranes, by J. H. M. Aalders and D. E. Elrick, 555.
Apparatus for the injection of gas samples under vacuum in gas chromatography, by R. B. Hems and J. B. Adams, 430.
Apparatus for the rapid processing techniques in electron microscopy, by A. Houghton and W. E. Reed, 266.
Apparatus for the simultaneous monitoring of absorbance and oxygen uptake in biological systems, by G. H. Fynn, 561.
Apparatus permitting visual observations during the vacuum deposition of thin films, by P. Mihalik and S. M. Hiemstra, 29.
Applications of the Pro-Milk Mk II: Part I, by T. C. A. McGann and J. A. O'Connell, 489; Part II, by J. A. O'Connell and T. C. A. McGann, 552; Part III, by T. C. A. McGann, A. Mathiassen and J. A. O'Connell, 628. Part IV, by T. C. A. McGann, A. Matthiassen, and J. A. O'Connell, 865.
Applied Photography, by C. R. Arnold *et al.* 739.
Arthropod cuticles showing helicoidal architecture, by B. M. Luke, 576.
Aspects of laboratory hygiene, by J. G. Davis, 101.
Atlas of Invertebrate Structure, An, by W. H. Freeman and B. Bracegirdle, 193.
Autoclave indicators, (Arnold R. Horwell Ltd.), 678.
Automatic apparatus for preparing soil extractions, by E. Akos and E. M. Varju, 496.
Autoradiography, Light-tight boxes for, (Arnold R. Horwell Ltd.), 51.

B

Bacterial flagella staining, by D. H. McCarthy and J. P. Stevenson, 267.
Balance, Density, (S. Garcia Ltd.), 375.
Balances, (Microwa), 831.
Balances, Electronic digital, (Sartorius), 594.
Balances, Top loading, (Mettler AG), 896.
Barbiturate test kit, (Hughes & Hughes Ltd.), 755.
Baryon masses derived from the uncertainty principle, by D. T. Lewis, 546.
Batch and continuous flow pelleting in the SZ-14 zonal rotor, by John R. Wells and Dennis M. Gross, 182.
Bath/circulator, (Hotpack Corp), 515.
Bath for tissue culture, (Lab-Line Instruments Inc.), 51.
Bath, Shaking, (Lab-Line Instruments Inc.), 133.
Bath, Water, (Bath Institute of Medical Engineering), 135.
Baths, Immersion thermostat for oil, (Scienco-Western Ltd.), 133.
Baths, Thermostatic water, (Techne (Cambridge) Ltd.), 677.
Baths, Water, (Horstmann Gauges Ltd.), 375.
Baths, Water, (Lab-Line Instruments Inc.), 831.
Binding energies and the tamaid energy quantum, by D. T. Lewis, 248.
Biological freezer, (Oxford Instruments Ltd.), 457
Biomaterial supports, (Corning Glass Works), 755.
Blood collection tubes, Disposable, (Teklab), 833.
Blood gas analyzer, (Corning-EEL Ltd.), 375.
Blood Groups and Techniques, by J. B. Harris, 887.
Blood sample tubes, Disposable, (Searle Diagnostic), 755.
Breeding Laboratory Animals, by Gloria R. Mosesson and Sheldon Scher, 436.
British Instruments Directory 1971, 193.
Bunsen burner, (Imperial Metal Industries Ltd.), 289.
Burette, (Shandon-Southern Instruments Ltd.), 751.

C

Cabinets, Low temperature, (Fisons Scientific Apparatus Ltd.), 204.
Carbon and sulphur determinator, (Shandon Southern Instruments Ltd.), 511.
Carbon rod atomizer, (Varian Associates Ltd.), 377.
Centrifuge, Laboratory, (A. Gallenkamp & Co. Ltd.), 831.
Centrifuge, Triple purpose rotor for, (Beckman Instruments Ltd.), 131.
Ceramic crystals, (International Research & Development Ltd.), 207.
Chemical calculations, by Sidney W. Benson, 501.
Chemiluminescent analyzer, (Scott), 896.
Chemiluminescent NOx analyzers, (Analysis Automation Ltd.), 291.
Chemostat, (New Brunswick Scientific Inc.), 295.
Chiller bath, (New Brunswick Scientific Inc.), 291.

Chromatograph, Dual column gas, (Varian Associates Ltd.), 753.
Chromatograph, Gas, (Bendix Vacuum Ltd.), 207.
Chromatograph, Gas, (Gow-Mac), 55.
Chromatograph, Liquid, (Field Instruments Ltd.), 295.
Chromatograph, Liquid, (Pye Unicam Ltd.), 49.
Chromatograph, Modular liquid, (Techmation Ltd.), 207.
Chromatography absorbent, Liquid, (Applied Science Laboratories Inc.), 377.
Chromatography, Aerosol for thin layer, (Fisons Scientific Apparatus Ltd.), 375.
Chromatography, Automation of, (Anachem Ltd.), 205.
Chromatography, Carriers for liquid, (E. Merck AG), 291.
Chromatography columns, (Chromatography Supplies Ltd.), 295.
Chromatography, Mass spectrometer for gas, (Vacuum Generators Ltd.), 371.
Chromatography/mass spectrometry, Computer system for, (Instem Ltd.), 895.
Chromatography plate marker, Thin layer, (Applied Science Laboratories Inc.), 451.
Chromatography supports, Liquid, (Applied Science Laboratories Inc.), 51.
Chromatography, Test kit for thin layer, (E. Merck AG), 49.
Chromatography, Tubing connectors for, (Bio-Rad Laboratories Inc.), 457.
Chromatography, Tubing for gas, (Scientific Glass Engineering Ltd.), 897.
Cigarette smoking machine for animal experiments, by B. M. Wright, 881.
Clinical Laboratory Computer Systems: A comprehensive evaluation, 885.
Coagulation meter, Electrode flamer for, (Arnold R. Horwell Ltd.), 457.
Cold vapour mercury atomic fluorescence detector, A, by K. C. Thompson, 645.
Colony counter, Automated, (New Brunswick Scientific Inc.) 835.
Combined use of a twin channel null-balance paramagnetic O_2 analyzer and an infra-red CO_2 analyzer for measuring respiration in insects, The, by A. G. Hamilton, 807.
Comment: 13; 83; 165; 243; 331; 409; 477; 543; 619; 711; 789; 857.
Comment on the correlation between the dielectric constant and the crystalinity of cellulose and similar fibrous materials, by A. Venkateswaran, 429.
Comparisons of the vapour pressure of aqueous solutions, by Hills method, by Björn Bördalen and Hagbarth Wang, 348.
Compilation of Reported 19*F NMR Chemical Shifts from* 1951 *to mid* 1967, by H. Dungan and J. R. Van Wazer, 652.
Computational Physics, edited by Jean Crow and M. G. Haines, 189.
Computing Methods in Quantum Organic Chemistry, by H. H. Greenwood, 569.
Constant environment unit for the plant sciences, by D. R. Davies, 491.
Construction and calibration of a micro conductivity cell, by A. E. Sherwood, 500.
Construction of a range expander for use with the Technicon AutoAnalyzer, by W. D. Basson and I. C. Hemingway, 810.
Continuous culture apparatus, (Lab-Line Instruments Inc.), 131.
Continuous scanning attachment for a low-angle X-ray goniometer, by A. T. S. Babb, 733.
Convenient and efficient extraction of lycopene from tomato products, by H. Sssekaalo, 729.
Conversion of an atomic absorption spectrophotometer to measure absorption in solution, by R. M. McKenzie, 494.
Cool tray, Bench, (ChemLab Instruments Ltd.), 207.
Counting chambers for haematology, (Graticules Ltd.), 591.
Coverslip staining tray, (Universal Optics Ltd.), 204.
Cryostats, (The Oxford Instrument Co.), 833.
Cryo-ultramicrotomy technique, (LKB Instruments Ltd.), 135.
Culture collection system, (Fisher Scientific Inc.), 375.
Culture media, Dried, (Wellcome Reagents Ltd.), 678.
Culture media, Powdered, (Flow Laboratories Ltd.), 377.
Current Instruments for Chemical Analysis, by L. W. Price, 661.

D

Data Plotter, (Pierce Chemical Co.), 896.
Data processor for NMR systems, (Varian Associates Ltd.) 289.
DC Arc Analysis, by N. W. H. Addink, 567.
Defining the Laboratory Animal, 502.
Deionizer, (Elga Products Ltd.), 291.
Densitometer attachment for gel electrophoretic measurements in the Unicam SP800 spectrophotometer, A, by N. J. Cartwright and M. H. Jeynes, 643.
Densitometer, Electrophoresis, (T. & J. Crump Ltd.), 207.
Detergent for pipette washers, (Alconox Inc.), 897.
Deuterium Labelling in Organic Chemistry, by A. F. Thomas, 885.
Developing rack and tank for extending the benefits of miniature thin layer chromatography, by T. T. Martin, 732.
Device for determing Rf values, by N. Andorn, 34.
Device for measuring density and for separation of particles by their density differences, by J. Blyth, 875.
Device for the direct reading of Rf values of two dimensional chromatograms, by S. K. Arora, 730.
Diagnostic Histochemistry, edited by F. T. Zugibe, 39.
Dialysis/concentration system (Amicon Ltd.), 677.
Differential thermal analysis, Sample holder for, (Fisher Scientific Co.), 129.
Diffusion capsule, (Lab-Line Instruments Inc.), 897.
Dispenser, Automatic, (ChemLab Instruments Ltd.), 207.
Dispenser, Micro, (Lab-Line Instruments Inc.), 513.
Dissolved oxygen meter, (T.E.M. Sales Ltd.), 457.
Dissolved oxygen monitor for fermentation studies, (Biotec Ltd.), 295.
Double filtration apparatus, by Arnold Singer, 648.
Dry gas sweep-vacuum evaporator for recovering solutes from multiple fractions of low boiling-point organic solvents in narrow mouth bottles, by T. T. Martin, 345.

E

Effluent sampler, Automatic, (ChemLab Instruments Ltd.), 457.
Electrode for ammonia measurement, (Orion Research Inc.), 207.
Electronics for Biologists of the Past and of the Future, by Georges C. Ware, 825.
Electronics for Medical and Biology Laboratory Personnel, by A. R. Tammes, 359.
Electron microscope studies of the fine structure of cellulose and modified cellulose, by A. Pande, 479.
Electron Probe Microanalysis, by L. S. Birks, 502.
Electrophoresis equipment, (T. & J. Crump Ltd.), 373.
Electrophoresis medium, (Reeve Angel), 753.
Electrophoresis power supply, (Brandenburg Ltd.), 457.
Electrophoresis power supply, (Quickfit Instrumentation), 53.
Electrophoresis power supply, (Shandon Southern Instruments Ltd.), 55.
Electrophoresis system, Gel, (Bio-Rad Laboratories Ltd.), 677.
Emission Spectrochemical Analysis, by M. Slavin, 501.
Enterobacteriaceae identification, (Diagnostic Research Inc.), 511.
Environmental test chambers, (Statham Instruments), 373.
Erythrocyte sedimentation rate system, (Accu-Tech Ltd.), 897.

Erythropoietin, (Arnold R. Horwell Ltd.), 135.
Essential Immunology, by I. M. Roitt, 502.
Estimation of Fe(III) spectrophotometrically by 7-nitro-8-quinolinol-5-sulphonic acid, by S. K. Patel, K. P. Soni, and I. M. Bhatt, 337.

F

Facilitation of the back reflection Laue technique, by T. E. Brown, 743.
Fast Reactions, by D. N. Hague, 568.
Fermenter instrumentation technique based on voltage to frequency conversion, by A. H. Carr, 883.
Fibre optics and its application, by R. Tiedeken, 653.
Fibre-optics, Infra-red transmitting, (Jenaer Glaswerk, W. Germany), 751.
Fibre optics light system for microscopes, (P. W. Allen & Co. Ltd.), 455.
Fibre optics, Radiation resistant, (Jenaer Glaswerk, W. Germany), 513
Filter, (W. & R. Balston Ltd.), 751.
Filter holders, Glass, (Schleicher & Schull), 207.
Fire extinguisher aerosol, (Fisons Scientific Apparatus Ltd.), 513.
Flammability testing, Module for, (Stanton Redcroft Ltd.), 377.
Flexible laboratory furniture as used in the science departments, University of Edinburgh, by Thomas Henney, 549.
Fluid bed dryer, (Palmer Research Laboratories Ltd.), 895.
Fluidic training kit for medicine, (Corning Glass Works), 455.
Fluorescence standards, (Perkin-Elmer Ltd.), 455.
Fluorimeter, Filter, (Baird-Atomic Ltd.) 593.
Fraction collector, (Linton Instrumentation), 755.
Fraction collectors, (Stalprodukter), 678.
Fraction collector, Pneumatic, (Linton Instrumentation), 593.
Free-Radical Substitution Reactions: Bimolecular Homolytic Substitutions (S$_H$2 Reactions) at Saturated Multivalent Atoms, by K. U. Ingold and B. P. Roberts, 190.
Freeze dryer, (Edwards High Vacuum Ltd.), 289.
Freeze dryer, Continuous, (New Brunswick Scientific Inc.), 895.
Freeze-etching, by A. W. Robards and G. R. Parish, 254.
Freezing stage, (The Bailey Company), 289.
Frozen thin sectioner, (V. A. Howe Ltd.), 373.
Furnace, Laboratory, (Metals Research Ltd.), 204.
Future of the agricultural analytical laboratory in academic institutions and its ideal structure, The, by N. T. Faithful, 177.

G

Gas alarm, Combustible, (International Gas Detectors Ltd.), 513.
Gas Chromatography, by D. Ambrose, 354.
Gas mixing apparatus, (Radiometer A/S), 371.
Gas sampling valve, (University of Nottingham), 204.
Gas sweep breathing oven for drying particulate materials and for processing thin layer chromatography plates, by T. T. Martin, 497.
Gel filtration, Column packings for, (E. Merck AG), 207.
Genetics Experiments with Bacterial Viruses, by D. P. Snustad and D. S. Dean, 435.
Glassware protection liquid, (Jencons Scientific Ltd.), 679.
Glassware washer, (Usines Jean Gallay & Co.), 594
Glassware washer for educational laboratories, (Scientific Instrument Centre Ltd.), 679.
Gradient mixer, (Pharmacia UK Ltd.), 377.
Growth chamber, (Sherer), 131.
Guard for laboratory experiments, (Williaam Cox Ltd.), 511.
Guide to Modern Methods of Instrumental Analysis, edited by T. H. Gouw, 735.
Guillotine for sectioning thin slices of soil from the face of a moist soil block, by E. Far. and W. A. Archibald, 563.

H

Handbook of Laboratory Safety, edited by N. V. Steere, 117.
Hardware for preparing high resolution replicas from frozen biological surfaces, by A. W. Robards, 579.
Hazards in the Chemical Laboratory, edited by G. D. Muir, 436.
Heat gun, (Nordiko), 678.
Histochemical transport solution, (Bethlehem Instrument Ltd.), 679.
Histology aid, Colour-coded, (Lab-Line Instruments Inc.), 515.
Hotplate/magnetic stirrer, (ChemLab Instruments Ltd.), 513.
Hydrogen determinator, (Shandon Southern Instruments Ltd.), 451.

I

Immunodiffusion plates, (Wellcome Reagents Ltd.), 129.
Immunoelectrophoresis apparatus, (V. A. Howe Ltd.), 455.
Immunology reagents and plates, (Meloy Laboratories), 896.
Improved methods for the preparation of liquid scintillation samples, by W. A. Roberts, 873.
Incubator, (Lab-Line Instruments Inc.), 591.
Incubator, Bench-top, (New Brunswick Scientific Inc.), 377.
Incubator, CO_2, (Lab-Line Instruments Inc.), 511.
Incubator, Water-Jacketed CO_2, (The National Appliance Company), 289.
Incubators, (Griffin & George Ltd.), 513.
Inexpensive constant pressure pulsatile perfusion pump, by R. B. Cross and J. Trace, 351.
Inexpensive microscope lamp, An, by P. F. Lumley, 273.
Inexpensive spreader for thin layer chromatography, by J. H. P. Tyman and A. Higdon, 559.
Injection block for small animals, An, by W. E. Brocklehurst and C. H. Cashin, 731.
Inoculating loops, Disposable, (James A. Jobling & Co. Ltd.), 833.
Insect light trap, (Burkard Scientific Sales Ltd.), 753.
Instrument check systems, edited by Winstead, 117.
Instrument tray covers, Disposable, (Evans, Adlard & Co. Ltd.), 515.
Interpretation of Electron Diffraction Patterns, by K. W. Andrews *et al*, 501.
Introduction to Medical Laboratory Methods, by A. Lamela, 887.
Introduction to 19F NMR Spectroscopy, An, by E. F. Mooney, 653.
Introduction to Research with Continuous Cultures, by Herbert E. Kubitschek, 279.
Ion activity meter, (Pye Unicam Ltd.), 593.
Ion and Ion Pairs in Organic Reactions Vol. I, edited by M. Szwarc, 885.
Ion-beam etching, (Ion Tech Ltd.), 595.
Ion gauge, Analytical, (20th Century Electronics Ltd.), 373.
Isotope dilution analysis, by J. Tolgyessy *et al*, 652.

J

Jack, Laboratory, (A. Gallenkamp & Co. Ltd.), 204.

L

Laboratory Animal – Principles and Practice, The, by W. Lane-Petter and A. E. G. Pearson, 887.
Laboratory design: microbiological risks, by R. R. Gillies, 91.
Laboratory Equipment Directory and Buyers' Guide, 1972, 436.
Laboratory Guide to Parasitology: with Introduction to Experimental Methods, by R. W. Macy and A. K. Berntzen, 437.

Lamps, Hollow cathode, (EMI Ltd.), 679.
Laser applications in medicine and biology Vol. 1, edited by M. L. Wolbarsht, 119.
Laser, Laboratory, (Taylor Hobson Optics), 679.
Laser Raman Spectroscopy, by M. C. Tobin, 354.
Light source, Ultra-violet/visible, (McKee-Pedersen Instruments), 371.
Liquid nitrogen level indicator for use with semiconductor radiation detectors, by L. D. Brown, 727.
Liquid scintillation counting: sample preparation techniques for organic materials, by D. R. Nicoll and M. J. C. Ewer, 174.
Liquid scintillator methodology, by M. Ayad, 723.

M

MacroPhoto and cine methods, by A. and I. Tolke, 567.
Mantle with built-in stirrer, Heating, (Electrothermal Engineering Ltd.), 293.
Manufacturers' Publications: 43; 123; 197; 283; 363; 441; 505; 573; 659; 742; 823; 890.
Materials testing cabinets, (Gebr. Liebisch), 897.
Mattenheimer's Clinical Enzymology: Principles and Applications, edited by H. Mattenheimer, 116.
Membrane filtration method for the evaluation of quaternary ammonium disinfectants, by J. M. Prickett and B. D. Rawal, 425.
Membrane science and technology, edited by J. E. Flinn, 116.
Mercury detection unit, (Shandon Southern Instruments Ltd.), 131.
Mercury dispenser, (Bethlehem Instrument Ltd.), 375.
Method for sampling microvolumes of soil from around absorbing root surfaces of individual plants grown under controlled conditions in the laboratory, by E. Farr and W. A. Archibald, 349.
Methods in Microbiology Vol. 5A, edited by J. R. Norris and D. W. Ribbons, 357.
Microbiological uses of 2,3,5,-triphenyltetrazolium chloride: an addendum, The, by R. G. Pegram, 340.
Microdensitometer, Computer controlled, (Joyce, Loebl & Co. Ltd.), 451.
Micro fraction accessory for the dry gas sweep vacuum evaporator, by T. T. Martin, 347.
Microscope as a camera, The, edited by H. A. Traber, 275.
Microscope, Electron, (Siemens UK Ltd.), 833.
Microscope, Field emission scanning electron, (Coates and Welter), 833.
Microscope, Fluorescence, (Carl Zeiss, Jena), 515.
Microscope for microtome knife inspection, (British American Optical Co.), 377.
Microscope, Pocket, (Northgate Instruments Ltd.), 455.
Microscope, Projection, (British American Optical Co.), 204.
Microscope, Research, (British American Optical Co.), 457.
Microscope, Scanning Electron, (Cambridge Scientific Instruments Ltd.), 55.
Microscope, Scanning electron, (Hitachi Ltd.), 59.
Microscope, scanning electron, (Hitachi-Perkin Elmer), 681.
Microscope, Scanning electron, (Vacuum Generators Ltd.), 681.
Microscope slide aerosol, (Fisons Scientific Apparatus Ltd.), 371.
Microscope slides, Position referenced, (Graticules Ltd.), 203.
Microscope, Stereo-, (Carl Zeiss, W. Germany), 133.
Microscope with three dimensional viewing, (Taylor Hobson Optics), 515.
Microscope, Zoom stereo-, (British American Optical Co.), 594.
Microscopy, Aerosol for fluoresence, (Marshall-Hewlett Ltd.), 289.
Microtome, (British American Optical Ltd.), 755.
Microtome, (V. A. Howe Ltd.), 207.
Microtome, Freeze-etching, (Balzers High Vacuum Ltd.), 897.
Microtome knife sharpener, (E. Leitz Ltd.), 595.
Microtome knife sharpener, (Shandon Southern Instruments Ltd.), 135.
Microtome, Sledge, (Cambridge Scientific Instruments Ltd.), 204.
Mill, Laboratory, (Lab-Line Instruments Inc.), 205.
Mills for continuous cell disintegration, (Willy A. Bachofen), 591.
Mitotic recombination in yeast as a test of genetic damage, by James M. Parry, 417.
Models for teaching protein and nucleic acid structures, by Ivor Smith, 483.
Modern Practice in Liquid Chromatography, edited by J. J. Kirkland, 35.
Modifications of cellular mutagenicity test procedures, by B. A. Bridges, 424.
Modified Monier-Williams apparatus for sulphur dioxide determination, by J. A. Gothard and A. G. Michel, 879.
Molecules Measurements, Meanings, by D. W. Krogmann, 357.
Monographs on Applied Optics: No. 3 *The Opital Transfer Function*, by K. R. Barnes, 275: *No.* 4 *Metal dielectric multilayers*, by J. P. Macdonald, 275.
Mountant for biological specimens, (Hughes & Hughes Ltd.), 753.
Multipurpose rack for the more efficient handling of miniature thin layer Chromatography plates, by T. T. Martin, 649.
Mutation testing with cultured mammalian cells, by Colin F. Arlett, 420.

N

New technique for the preparation of primary cultures of oyster tissue, A., by Amanda M. Wallis, 32.
Newer Methods of Preparative Organic Chemistry Vol. VI, edited by W. Foerst, 278.
News: 45; 125; 199; 285; 365; 447; 507; 587; 671; 745; 827; 891.
NMR Basic Principles and Progress Vol. 5, edited by R. A. Hoffman *et al*, 278.

O

Observations on the quantitative analysis of fatty acids in bovine blood serum, by C. C. Webber, E. G. Moody and R. D. Johnson, 107.
Official and Independent Reports: 41; 121; 195; 281; 361; 439; 503; 571; 657; 741; 821; 889.
Orbital shakers, (Linton Instrumentation), 51.
Organic Photochemical Syntheses Vol. 1, edited by R. Srinivasan and T. D. Roberts, 359.
Oscilloscope, Miniature, (Tektronix Ltd.), 51.
Oxygen sensor, (Beckman-RIIC Ltd.), 515.

P

Particle suspension in Coulter Counter analysis, by A. W. Nienow and H. M. Ang, 495.
Pathobiology, an introduction, edited by J. Minckler *et al*, 886.
Petri dish filler, (Struers Chemiske Laboratorium), 204.
pH controllers, (Jewel Electronics Ltd.), 295.
pH electrode, (Electronic Instruments Ltd.), 681.
pH electrode, (Leeds & Northrup Ltd.), 897.
pH kit, Portable, (Leeds & Northrup Ltd.), 205.
pH measuring and control (Ulmaelektro Oy), 681.
pH meter, Digital, (Orion Research Inc.), 897.
pH meter, Portable, (Beckman-RIIC Ltd.), 679.
pH meters, Digital, (Fisher Scientific Co.), 833.
pH meters, Digital printer for, (Orion Research Inc.), 49.
Phenolic amides as indicators in the direct NTA titration of iron, by M. N. Desai, B. M. Desai, C. R. Vora and M. H. Gandhi, 715.
Philips – the moves behind the hardware, by J. Walsh, 581.
Photochromism, edited by Glen H. Brown, 278.
Photodetector for diffraction measurements, (Recognition Systems Ltd.), 453.

Photo-electric control and measurement of light in the glasshouse, by R. C. Hignett, 433.
Photometer digital concentration, (Vitatron), 53.
Photometer, Colour, (Beckman–RIIC Ltd.), 455.
Photometer, Filter, (Beckman–RIIC Ltd.), 205.
Photometer system, Modular, (Fisons Scientific Apparatus Ltd.), 455.
Physical Methods of Chemistry, Part V Vol. 1. *Determination of Thermodynamic and Surface Properties,* edited by A. Weissberger and B. W. Rossiter, 437; *Part II, Electrochemical Methods,* edited by A. Weissberger and B. W. Rossiter, 276.
Physics in the food laboratory, by G. W. White, 20.
Pig as a Laboratory Animal, The, by L. E. Mount and D. L. Ingram, 191.
Pipetter, Micro-, (Sirius Instruments Ltd.), 453.
Pipettes, Disposable, (Sterilin Ltd.), 515.
Plasmerpheresis, by Jean Carr, 114.
Polarimeter, (Atago Optical Co.), 678.
Polarimeter, (Cenco Instrumenten Mij NV), 751.
Polariscope, Demonstration, (Sharples Photomechanics Ltd.), 295.
Polypropylene beaker range, (Xlon Products Ltd.), 295.
Polythene wash bottles, (Fisons Scientific Apparatus Ltd.), 49.
Power unit kits, (Startronic), 753.
Practical Catalytic Hydrogenation, by M. Freifelder, 191.
Practical Measuring Techniques for Beta Radiation, by L. A. J. Venverloo, 653.
Practical Section Cutting and Staining, by E. C. Clayden, 435.
Preparation of tetramethylammonium hydroxide solution for use in pH titrations, The, by H. S. Dunsmore and D. Midgley, 791.
Preparative Gas Chromatography, edited by A. Zlatkis and V. Pretorius, 279.
Problems for General Chemistry and Qualitative Analysis, by C. J. Nyman and G. B. King, 191.
Process timer, Multiple, (Arnold R. Horwell Ltd.), 896.
Progress in Separation and Purification Vol. 4, edited by E. S. Perry and C. J. Van Oss, 735.
Proton-electron-antineutrino oscillator, (PEA), The, by D. T. Lewis, 794.
Pump, Diaphragm, (New Brunswick Scientific Inc.), 375.
Pump, Peristaltic, (Cenco Instrumenten Mij NV), 594.
Pump, Peristaltic, (Linton Instrumentation Ltd.), 681.

R

Radiation hazards in hospital laboratories, by J. R. Greening, 97.
Radiochromatograms, Imaging system for, (Panax Equipment Ltd.), 371.
Radioisotope teaching kit, (Applied Science Laboratories Inc.), 515.
Rapid colorimetric determination of phosphorus in carbonate rocks, by Dharam Prakash and Chandra Shekhar, 863.
Rapid continuous flow method for tissue processing, by A. R. A. Noel, 815.
Rapid estimation of washing efficiency of precipitates by means of a nomograph, The, by A. Zanker, 431.
Rapid microdiffusion method for the determination of sulphides in biological fluids, A, by J. M. Debevere and J. P. Voets, 713.
Reactions of Molecules at Electrodes, edited by N. S. Hush, 36.
Reactions resulting from the use of a molecular sieve as a drying agent, by J. E. Connett, 545.
Reagents for esterification of fatty acids, (Pierce Chemical Co.), 753.
Recorder interface, (McKee-Pedersen Instruments), 131.
Recorders, Pen, (S. E. Laboratories Ltd.), 295.
Recorders, X–Y, (Techmation Ltd.), 594.
Refractometer for pathology laboratories, (British American Optical Co. Ltd.), 455.
Refractometers, Abbe, (Atago Optical Co.), 681.
Research kits for clinical and biomedical research, (Applied Research Laboratories Ltd.), 373.
Resins for polypeptide separations, (Durrum Chemical Corp.), 593.
Reverse osmosis systems, (Elga Products Ltd.), 895.
Review of Laboratory Medicine, by J. S. Meyer and L. S. Steinberg, 886
Rollers, (Jencons Scientific Ltd.), 678.
Routine method for the estimation of ionic calcium activity and concentration in biological solutions, by T. J. French, B. E. Cham, and R. B. Cross, 333.

S

Safety in hospital laboratory design, by S. C. Frazer, 85.
Safety considerations in laboratory instrument design and operation, by L. W. Price, 93.
Sample injection for liquid chromatography columns, by H. R. Hazelton, 499.
Sampling system, Automatic, (Cenco Instrumenten Mij NV), 451.
Scaffolding, Laboratory, (Climpex Ltd.), 515.
Scaler timer for schools, (Panax Equipment Ltd.), 135.
Scanning Electron Microscopy: Systematic and Evolutionary Applications, edited by V. H. Heywood, 565.
Scanning technique for multi-element analysis by flame atomic emission spectroscopy, A, by D. O. Cooke, R. M. Dagnall, H. N. Johnson, G. F. Kirkbright and T. S. West, 171.
Scintillator sheets, Curved, (Nuclear Enterprises GB Ltd.), 895.
Scheme to aid an analytical operation, A., by V. O. Cirino, M. K. Black and J. S. Mason, 803.
Screening for environmental agents causing genetic damage: Introduction, by B. A. Bridges, 411.
Selecting a Computer System for the Clinical Laboratory, by M. J. Ball, 357.
Semi-micro distillation apparatus with internal condenser and receiver, by A. E. Sherwood, 353.
Separation of proline from plant extracts by thin layer chromatography and its colorimetric estimation, The, by M. Cocker, 33.
Sequence analyzer for protein studies, (Jeolco UK Ltd.), 835.
Shaker, Beaker, (Voss Instruments Ltd.), 594.
Shakers, Controlled environment, (Linton Instrumentation), 205.
Sharpening a microtome knife on the Elliott knife sharpening machine, by S. J. Gray, 261.
Sickle cell anaemia test kit, (Micro-Diagnostics Inc.), 515.
Sickle cell diagnosis kit, (Canalco Inc.), 679.
Simple assembly for freeze-drying of tissue samples, A, by Fedor Medzihradsky, 115.
Simple bacterial systems for detecting mutagenic agents, by B. A. Bridges, 413.
Simple and versatile pressure filtering and pressure membrane device, A, by B. Darbyshire and R. N. Anlezark, 554.
Simple constant flow rate ion exchange column, by A. M. Mulokozi, 872.
Simple steam sterilizable dissolved oxygen electrode, A., by P. J. Radlett, A. J. Breame and R. C. Telling, 811.
Simultaneous electrolyte, urea and bicarbonate determination, by C. Clark, R. A. Hall and J. Robinson, 859.
Small capacity tank for evaporative thin layer chromatography, A, by A. E. Sherwood, 184.
Small scale replicate animal cell cultures suitable for studies involving radioisotopes, by I. Macpherson and A. Bryden, 112.
Solute-gel interactions in gel filtration, by K. W. Williams, 667.
Some observations on the reduction of 2,3,5 triphenyltetrazolium chloride, by *Escherichia coli,* by R. G. Pegram, 167.
Source unit for the flameless atomic absorption determination of mercury, by R. A. Nicholson and J. D. Smith, 638.
Specific ion/pH meter programmer, (Leeds & Northrup Ltd.), 755.

Spectrometer, Computer controlled, (Fisher Scientific Co.), 678.
Spectrometer for education, Mass, (Vacuum Generators Ltd.), 751.
Spectrometer, X-ray, (Jeolco Ltd.), 678.
Spectrophotometer, (Perkin-Elmer Ltd.), 897.
Spectrophotometer, Concentration, 835.
Spectrophotometer, Double beam, (Varian Associates Ltd.), 129.
Spectrophotometer, Infra-red, (Cambridge Scientific Instruments Ltd.), 375.
Spectrophotometer, Infra-red, (Grubb Parsons), 835.
Spectrophotometer, Infra-red (Perkin-Elmer Ltd.), 897.
Spectrophotometers, Atomic absorption, (Perkin-Elmer Ltd.), 453.
Spectrophotometers, Modular, (Varian Associates Ltd.), 293.
Spectroscopic Tricks, Vol. 2, edited by L. May, 355.
Spectroscopy cell window polisher, (University of Nottingham), 377.
Stability of ion exchange resins, The, Part I, by G. J. Moody J. D. R. Thomas, 632; Part II, 717; Part III by M. A. Minto, G. J. Moody and J. D. R. Thomas, 797.
Staining machine, (Arnold R. Horwell), 453.
Still, General purpose, (Jencons Scientific Ltd.), 131.
Stirrer, Magnetic, 831.
Stirrer, (Cenco Instrumenten Mij NV), 204.
Stirrer, (Citenco), 373.
